

We ask prospective owners a variety of questions to ensure they understand the commitment required to raise an orphan kitten or give a cat a forever home. We require all adopted kittens and cats to be spayed/neutered so that our orphans will not contribute to the orphan kitten problem in years to come. Everyone deserves a home!

## About Us

Our organization is a Canadian official non-profit volunteer society. The kittens and cats we care for come primarily from homeless mother cats: some wild, some tame. The wild mothers are spayed and either re-released to the area they were found, or placed in a feral home. The kittens are placed in foster homes for rehabilitation. Rehabilitation of wild cats can happen with patience and understanding. The younger the kitten, the easier and faster the rehabilitation will occur. Other kittens come our way if their mothers are killed, missing or if they have a medical problem that requires attention. The medical attention we give is often labor intensive. Because we have many veterinary nurses and assistants who help our fund, we are able to help those kittens that other organizations cannot.

Our fund depends on the understanding and generosity of the community to help homeless cats and kittens. If you can provide a loving home, please contact us! Generous veterinarians often give advice and support for the orphans, but the primary care givers and fund raisers are caring non-professional individuals who volunteer their time and efforts. For this reason, we base the charity out of the founders home, and frequently require people to pick up supplies and cats from the McKenzie Veterinary Clinic. Funding is primarily raised through craft sales, garage sales and donations.

250.896.5771

There is no cost to adopt the older cats we have available for adoption, we ask only for a donation (approximately \$100 is the norm, which covers food and medical care for those that need it!). For the kittens, we ask prospective owners to pay the cost of the second vaccine and to pre-pay the spay/neuter costs. These costs usually amount to approximately \$170 for males and \$210 for females.
